

SIRIUS Long Range Strobe

Typical SOLAS and USCG Approved strobe lights are effective signaling devices but have a visible range of only a few miles. The SIRIUS LRS combines the same characteristics of our SIRIUS Strobe with the long range signaling power of a focused beam strobe to reach out over great distances to searching aircraft and surface vessels. The SIRIUS LRS (Long Range Strobe) allows users to aim a focused strobe beam and reach out to targeted search assets, far out on the horizon and dramatically increase the probability of detection over greater distances than a standard strobe light.

Technical Specifications:

640-LRS	641-LRS
ON = FLASHING	ON = Armed (Water Activation)
OFF/ON (2-Cycles) <3s = LRS Activation	Brief Flashing of Outside LEDs (3-4s) ON wait (3-4s) Cycle OFF/ON 2x= Signal Strobe Flashing
Requires (2) AA Alkaline or Lithium Batteries	OFF/ON (2-Cycles) <3s = LRS Activation
Size: 3.6" x 2.0" x 1.1"	Requires (2) AA Alkaline or Lithium Batteries
Weight: 3.3 oz. (with batteries)	Size: 3.6" x 2.0" x 1.1"
	Weight: 3.3 oz. (with batteries)

Features:

- ✓ Bright White Signal 60 Flashes a Minute for Over 18 Hours
- ✓ Flash with Reduced Brightness for 5 Days +
- ✓ 7-Degree Spot Reflector for Long Range Signaling
- ✓ Quarter-Turn Tail Cap Permits Easy and Rapid Battery Change

- ✓ 10-Minute (LRS) Auto Revert Back to Signal Strobe
- ✓ Tether Cord to Secure Light in Equipment Pock
- ✓ High Visibility Orange Case

**U.S. Coast Guard SOLAS Approved:
161.112/109/0**
