

Cut Away Marine Safety Helmet

The cut away marine safety helmet has been designed to meet the needs of people working in high noise environments .

The cut away helmet is a variation of our popular open face helmet model with the side sections of the helmet removed to allow for ear protection to be worn with the helmet. The cut away sections do not compromise on the safety of the helmet as it still meets the BSI marine safety helmet standard PAS 028:2002.

The Gecko cut away marine safety helmet does not have side inserts to mount equipment however it will take a sticky pad grip attachment for those who wish to use it alongside flashlights and camera equipment. Ear defenders can be mounted to the helmet or worn underneath it.

Design

Using computer aided design the ABS construction provides incredible protection and the grooved design gives an excellent strength to weight ratio. The patented inflatable liner is an integral part of the helmet design; through an oral valve the liner has the ability to inflate or deflate to create a perfect fit every time. The strap has been designed to fit around your ear defenders allowing for a snug fit to your head.

Specification

Size: 57cm – 62cm
Weight: 620 grams
Marine Safety Helmet PAS 028:2002
Eye Protection BS4110 with visor
Ear Defence EN352-3 with ear defenders
