

PERSONAL PROTECTION MASK - COVID 19

Aviation and Survival Support can now offer the Honeywell North RU8500 series Half-Mask respirator, both in standard version and modified with various communication solutions and helmet/headset attachments. The RU8500 is designed to minimize the breathing of airborne contaminants and provides optimal respiratory protection essential for aircrew and other specialist users in varied harsh work environments.

PROTECTION TYPE

When used with the appropriate filters, cartridges or filter/cartridge combinations, the North RU8500 is an air-purifying respirator for protection from particulates, gases or vapors, or any combination of particulates, gases and vapors.

For this specific Covid-19 situation we offer the mask with a P100 cartridge filter, with the following ratings:

P = Oil Proof

100 = Removes 99.97% of all particles that are 0.3 microns in diameter or larger. HE or HEPA quality filter.

CERTIFICATIONS

The North RU8500 is currently NIOSH approved as an airpurifying respirator and also as a continuous flow supplied air respirator (CF-SAR).
