

Open Face Marine Safety Helmet

The open face helmet is the most popular in the range, providing unparalleled protection and versatility.

Gecko Head Gear first developed the open face marine safety helmet for the RNLI to fill a gap in the market for a lightweight, high performance helmet that is suitable for use in marine environments. For twenty years the RNLI have continued to use this helmet and have helped to refine the design. Today, the Gecko open face helmet is used by numerous organisations worldwide including the Royal Air Force, Police and MOD. It meets BSI marine safety helmet standard PAS 028:2002.

The open face marine safety helmet is compatible with a variety of accessories including visors, goggles and comms. The helmet has two side inserts that take grips to hold equipment such as a camera or flashlight. Please note that ear defenders cannot be worn with this helmet, so please see our cut away model if this is one of your requirements.

Design

Using computer aided design the ABS construction provides incredible protection and the grooved design gives an excellent strength to weight ratio. The patented inflatable liner is an integral part of the helmet design; through an oral valve the liner has the ability to inflate or deflate to create a perfect fit.

Specification

Size: 56cm – 63cm
 Weight: 670grms
 Marine Safety Helmet PAS 028:2002
 Mountaineering Helmet EN 12492
 Eye Protection BS4110 with visor
 Ear Defence EN352-2 with ear plugs
