SEARCH AND RESCUE SURVIVAL SOLUTIONS

INSPIRING CONFIDENCE... FACE ANY SCENARIO WITH THE VERY BEST

Whether you are responding to a vessel in distress, helicopter ditching or a man overboard situation, you don't get a second chance when your life and the lives of others are on the line. For over two decades Survitec has worked closely with the world's most respected Search and Rescue professionals to develop a range of Survival Equipment for those working daily in the most unpredictable and hazardous environments.

LIFERAFTS

Over two decades experience and over 1000 rotary and fixed wing aircraft units in operation globally.

LIFE PRESERVERS

Crew and passenger life preservers for military, civil and para-public organisations.

IMMERSION SUITS

Over 30,000 suits managed globally per annum, customised to meet specific mission requirements.

SUPPORT EQUIPMENT

World's largest collection of support equipment including Locator Technology, Recovery Devices and Harness Equipment.

SERVICES

Engineers trained to the highest standards covering every aspect of inspection, service and maintenance.

THE SAR RAFT

When an aircraft ditches and the crew and passengers have a matter of seconds to make a decision, it is crucial they are equipped with the very best in lifesaving equipment. In order to improve chances of survival, a life raft must be designed to incorporate every element specific to an aircraft emergency situation.

With over two decades experience and over 1000 rotary and fixed wing aircraft units in operation globally, the SAR Raft provides Search and Rescue agencies with a universal air droppable liferaft system that is simple and quick to deploy. Developed to optimise the Search & Rescue air drop operation,

the SAR Raft integrates the raft/aircraft interface into the entire design phase with no need for costly airframes or modifications.

Tried and tested in a large number of SAR missions, the raft offers critical weight and space saving with a single compact package, and can be despatched from virtually any rotary or fixed wing aircraft. The SAR Raft has also accumulated years of valuable experience with a large number of key commercial aviation clients such as Alenia Aeronautica, Agusta Westland and Bristow Group.

HELIRAFT

UNIVERSALLY ADAPTABLE, CONFIGURED FOR USE ON VIRTUALLY ANY ROTARY OR FIXED WING AIRCRAFT

Users can select from two types of market leading SAR Liferafts, the unique Heliraft and the popular Aerolite. This presents a wide choice of capabilities for SAR operations, including military, coast guard, offshore oil industry, commercial aviation and civilian emergency situations.

AEROLITE

FORWARD FLIGHT

FIXED WIND DEPLOYMENT

Available in a large range of stowage options, and uniquely suitable for multiple applications including commercial and military use as well as rotary-wing applications.

HOVER MODE

ROTARY-WING DEPLOYMENT

Designed as a fully integrated part of the whole helicopter operation with rapid deployment and boarding solutions.

LIFE PRESERVERS

Your life preserver is possibly one of the most important pieces of equipment on board any vessel. So when an emergency arises, it is vital to know that the life preserver you are wearing is reliable, robust and secure. With over 5 decades experience and over one million life preservers produced to date, the Survitec Group is a world market leader in this field.

As choice supplier to some of the leading Search and Rescue organisations, we strive to ensure our life preservers meet and exceed the standards of all major international regulatory authorities, including US FAA and European EASA.

**SECURITY OF SUPPLY
FOR OVER FIVE DECADES
WITH OVER ONE MILLION
LIFE PRESERVERS
PRODUCED TO DATE**

MK15

Developed in conjunction with the Ministry of Defence and the Royal Air Force Institute of Aviation Medicine, the MK15 life preserver is designed for use by aircrew of helicopter and non-ejection seat aircraft. The life preserver consists of a lightweight waistcoat with integral blast-resistant pouch, a stole container, and an inflatable profiled stole. Designed as a compact solution, the MK15 is comfortable to wear and provides excellent fit and manoeuvrability.

MK44

Survitec's Beaufort crew lifejacket for rotary/fixed wing aircraft comprises of a fully adjustable waistcoat and a twin-chamber inflatable stole which is contained within a protective pouch. Both the front of the waistcoat and stole pouch are manufactured from 'breathable' flame retardant fabric, while the back is manufactured from mesh fabric to reduce heat discomfort and fatigue. Optimising fit, comfort and functionality, the MK44 has been designed to offer maximum immersion protection while meeting operational demands.

MK28 & MK28WB

The MK28 Lifejacket was designed in conjunction with major operators and approval authorities for passenger and crew requirements. With an ultra slim stole pouch, the life preserver is easy to don and doff and is light weight to ensure ease of manoeuvrability. CAA and FAA approved the MK28 offers proven performance in extreme operating conditions with a reputation for comfort, longevity and ease of maintenance.

IMMERSION SUITS

Survitec have worked closely with the world's most respected Search and Rescue professionals to develop a range of Immersion Suits for those working daily in the most unpredictable and hazardous environments.

We offer a wide range of innovative and practical solutions, working closely with customers to develop customised products for individual mission requirements. Most recently our collaboration with Royal Dutch Rescue Organisation (KNRM) has enabled us to design and manufacture a fully integrated Constant Wear Immersion Suit package.

We currently support 32,000 customer owned immersion suit assets and operate a rental fleet of 36,000 transit suits used on a daily basis. Our powerful asset tracking system CSAM logs equipment movements, repairs and issues allowing staff to plan and manage over 150 rotor wing flights per day.

1000 SERIES

With the introduction of additional EASA (European Aviation Safety Agency) regulations in 2006, we commenced development on a new generation of Survival Suit, the 1000 Series. Using the latest offshore sizing information and feedback from offshore workers, we have developed a suit built to fit today's offshore work population. The 1000 Series suit project has since developed a bespoke line of aircrew immersion suits to satisfy the demands of commercial and military helicopter aircrew. Our latest product development in this range, the 1000 Series SAR Winchman, works to protect the search and rescue Winchman in the most unpredictable environments. Manufactured utilising the most elite, technologically advanced fabric and components available, the outer shell of the suit is waterproof, breathable and inherently flame retardant. The thermal lining uses state-of-the-art Outlast® Phase Change Materials (PCM) technology, to improve thermal comfort and reduce thermal stress.

SAR WINCHMAN

Developed as a high specification garment designed to meet the unique demands of helicopter search and rescue Winchman, the SAR Winchman has a long pedigree in the civilian sector, particularly for use by helicopter aircrews and paramedics servicing the offshore oil and gas logistic support worldwide. The optimised design offers maximum flexibility and mobility, whilst the light, breathable and flame retardant fabric offers anti-static properties as well as improved comfort and protection.

EMPHASIS ON FUNCTIONALITY AND RELIABILITY WHILST MINIMISING BULK AND WEIGHT BURDEN

SUPPORT EQUIPMENT

Providing unparalleled choice to our customers, we can offer a wide variety of support equipment from across the Survitec Group. We continuously review and assess new products and sources of supply throughout the world to ensure we are able to bring to our customer's cost effective and comprehensive survival solutions.

We have forged distributor dealership rights with some of the world's most reputable names in survival industry and our product range reflects our total commitment to safety.

HARNESSEQUIPMENT

Self and Assisted Rescue, Casualty Recovery, Emergency Evacuation and Suspension Trauma Relief.

LOCATOR DEVICES

EPIRBs, SARTS, VHF Radio, Equipment and Lighting.

RESCUE AND SURVIVAL

Pyrotechnics, Accessories and Lights, First Aid Kits, Stretchers, Man Overboard Recovery Devices, Lifting Baskets.

SERVICING

Safety and reliability are at the heart of everything we do, which is why our commitment to customers does not stop with the sale of new equipment, we also provide support that covers every aspect of inspection, service and maintenance. Our engineers are trained to the highest possible standards and have taken the prerequisite industry qualifications.

We carry out regular and rigorous servicing and maintenance through our global service network to ensure that our customers have the best and most reliable survival products on the market.

In addition to standard servicing we carry out both major and minor repairs to rescue boats, liferafts and lifejackets. We have our own in-house cylinder bays and engineering workshops where we investigate the condition of equipment prior to carrying out any extensive repairs.

As an MCA and FAA approved company we have a strong reputation for reliability of service and workmanship. Our work is always of a high standard and our technical ability is continuously being upgraded with the latest equipment, facilities and training.
