

MoG Fast Rope 9163 Black

upgraded version 2023

Our Fast Rope gloves have been developed together with the Instruction Group Rotary Wing (Royal Dutch Army) and are intended for professional and tactical use during training and operations.

NEW - the upgraded version has extended split leather patches across the fingers and in the crotch between thumb and index finger

slim fit finger construction provides extremely high finger sensitivity for handling ropes, weapons, radio and equipment, and avoids the risk of twisted fingers

reinforcement of critical areas on / between thumb and index finger, for extra protection

back of hand in 4-way stretch and quick drying fabric for a breathable, comfortable fit

extra wide cuff with hook and loop closure and tight fit around the wrist

recess on crucial areas on index finger and thumb for extra flexibility

split leather palm provides excellent grip, buffers against heat accumulation during fast roping and offers additional cut protection

additional padding in the palm of the hand guarantees high protection against friction and heat development, enabling roping operations up to 90 Ft.

extra stitching lines at strategic points ensure higher dexterity

opening for attachment to carabiner, belt or plate carrier

Applications

- _ for fast rope training and operations
- _ for descents up to 90 ft

Target groups

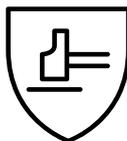

- _ armed forces
- _ special units / law enforcement
- _ rescue operators
