SUBMARINE ESCAPE IMMERSION SUIT

With fully integrated liferaft

The only fully integrated system delivered to 30 of the world's navies. The Submarine escape Immersion suit is a full-body garment designed for pressurised tower escape with thermal protection and a fully integrated single-seat liferaft for increased surface survivability.

BENEFITS

- ⦿ Improved buoyancy provided by in-built lifejacket
- ⦿ Greater thermal protection from 3-in-1 polar fleece
- ⦿ Larger ascent hood viewing panel enabling better manoeuvrability and spatial awareness
- ⦿ Fully integrated single seat liferaft offering over 24 hours of surface survival
- ⦿ None slip thermal soles supporting better protection and enhanced grip
- ⦿ Designed for reduced end-user CO2 saturation

*“Providing a proven
safe method of
Submarine Escape”*

MK11 SUBMARINE ESCAPE SUIT

TECHNICAL DATA

MK11 SEIE

Safety at Depth	Designed to escape from 180 metres
Improved Air Usage	Uses 30% less air than earlier designs
Rapid Ascent	Provides over 170N of buoyancy
Keeps Occupant Warm	Thermal protection for improved survivability
Excellent Buoyancy	Life raft Buoyancy made from 2 Ply Butyl
