

Njord Rescue Operator

Fully modular
pocketry

Modular
load carriage

Lightweight
construction

Maximum head/
helmet mobility

The Njord Rescue Operator Jacket is specifically designed for hoist and winch rescue operations, delivering exceptional performance in the most demanding environments. Extensively tested and qualified by end users, the jacket has been developed around the operational needs of rescue swimmers and operators, integrating critical survival features with outstanding functionality, comfort, and durability.

KEY BENEFITS

- Non emergency Rescue operator buoyancy included as standard for use during in-water operations
- Lightweight construction to minimise wearer fatigue.
- Low thermal burden for enhanced comfort during extended missions.
- Vest configuration allows carriage of equipment required for operational activities and survival.
- Low-bulk LPU system designed to maximise head mobility.
- Integrated high-volume STASS pocket with dedicated hose routing.
- Fully adjustable sizing system to maximise fit, comfort, and operational effectiveness.
- LPU buoyancy tested and approved to ETSO/TSO-C13g standards.

Available in a range of standard sizes. Size chart available on request.
